Disclaimer and Warnings

Read these instructions before commissioning and use of the product and its components!
With the launch of the product, you agree to the terms of the disclaimer and agree to the instructions.

Assemble the items on according to the instructions. Any changes to this or uses of Third-party products / spare parts can cause damage.

This excludes the acquisition of warranty claims!

The product is already in a functional state in the delivery condition. Take your time to start it.

There is no responsibility for damage or injury from the manufacturer, importer or distributor acquired, resulting from the use of the product.

Only use the supplied batteries!

Only start to use the product with an inserted camera!

External influences while using the gimbal may damage it!

Charging and Inserting the batteries

For the operation of the gimbal, the three Li-Ion cells from the content are required. Charge these with the included charger. This is indicated by a green LED on, when battery is fully charged.

If all three cells are charged, place them with the positive pole towards the gimbal head, one after the other into the handgrip. Note that no foreign bodies or volatilities are included.

Close the grip by screwing on the cap, with the Power Switch.

Mounting

Use the enclosed screws for mounting.

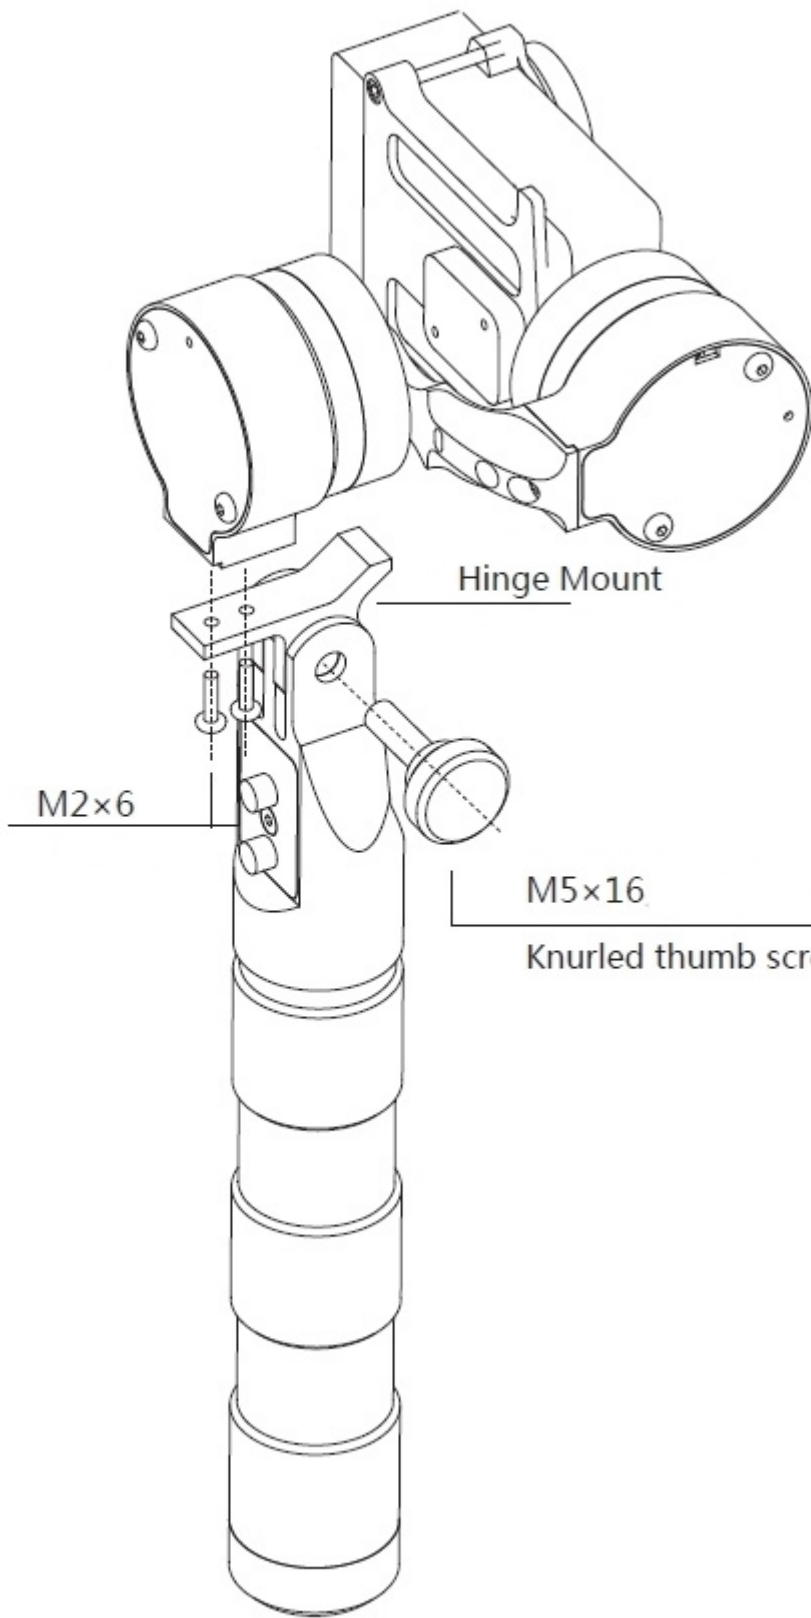

The gimbal comes with two brackets for the following camera models:

-CamOne infinity

GoPro Hero 3 / 3plus series

Choose the matching bracket for your camera. Take care when mounting the bracket that it is not tilted or jammed. Place the camera as shown on the below picture. Screw it with the supplied M2x22 screws.

Hinge Mount

M5×16 Knurled thumb screw

M2×6 Sunk Screw

M2×22 Knurled thumb screw

Make sure that all screws are firmly tightened.

First use

All components were observed and mounted by you in accordance with the previous points. Keep the Gimbal quietly in your hand and switch it on.

After connecting power, the blue LED on the Gimbal (on side of the logo) starts flashing. The gimbal will adjust itself automatically after a few seconds.

DO NOT MOVE THE GIMBAL BY HAND DURING THIS PROCEDURE!
Do not use the gimbal before any camera is inserted!

Make sure, that the functionality of the gimbal won't be influenced through dirt or moisture!

Handling and Operation

The handgrip can be adjusted to an angle of 120° .

The camera adjustment can be controlled through the 2 buttons.

Make sure, that the head of the gimbal does not overdrive 45°. Above this angle, you cannot set the adjustment.

Horizontal

The angle between the roll motor and the vertical of the ground should be less than 45°
